You, and all of your family, neighbors and friends who reside in Graham County can now view the complete Graham County Community Assessment Survey results online. please visit the home page of the Graham County website and click on the link to see what people, who participated in the survey said about their community!

Did you know that 3.62% of the 37,147 people that live in Graham County participated in the Graham County Community Assessment Survey and they indicated that good jobs and a healthy economy, low crime/safe neighborhoods and good schools define what a healthy community is?

The top three health concerns were alcohol and drug abuse, teenage pregnancy and child abuse and neglect.

Prescription Drug Abuse, Illegal street drug abuse and alcohol abuse were defined as the three most serious safety problems in Graham County communities.

In the Fall of 2012 the Graham County Community Health Assessment Project conducted a meeting that was attended by 60 people from different entities in the county. Five community meetings were also conducted one each in Safford, Thatcher, Pima, Ft. Thomas and Solomon/San Jose. From these meetings, information has been compiled about three important quality of life questions concerning people living in Graham County. The questions were:

- \* What are the strengths in your community?
- \* What does a healthy community mean to you?
- \* What are important characteristics of a healthy community for all who live, work and play here?
