**GRAHAM COUNTY
DRAINAGE CLEARANCE**

A Grading and Drainage Plan prepared by a registered professional engineer OR a Drainage Clearance Form filled out by a registered professional engineer is required if:

1. Your property is located in Eureka Springs, Thunderbird Valley, Thunderbird Hills or Sunset View subdivisions. In these subdivisions drainage clearance is required whether or not your property is in a flood hazard zone. If your property is in a flood hazard zone you are also required to obtain a Floodplain Permit from Graham County Engineering.

OR

2. The Graham County Engineer determines that Drainage Clearance is necessary.

A building permit will not be issued until the Graham County Engineer has approved the Grading and Drainage Plan or the Drainage Clearance Form prepared, signed and stamped by a registered professional engineer.

Items that are required in the Grading and Drainage Plan are listed in the attached State Standard 6-96. The Drainage Clearance Form is obtained from Graham County Engineering Dept.

**GRAHAM COUNTY PLANNING & ZONING DEPARTMENT
APPLICATION FOR SOILS INVESTIGATION REPORT WAIVER**

The International Code Council (ICC), International Residential Code Chapter 4 Section R401.4 provides the building official with authority to require a soils analysis, which would be made by a licensed architect or engineer. In lieu of the above, the owner of the property or his/her agent may attest to the on-site soil conditions and agrees to follow minimum County standard.

I, _____ (please print), being the owner or duly authorized representative of the owner of the property located at _____ with parcel number (APN) _____ hereby requests the requirements of the IRC relative to the requirement of a soils report be waived for the following reasons:

Please initial all conditions that apply at the building site:

- | | |
|--|--|
| _____ No fill on site | _____ No expansive soil on site |
| _____ Undisturbed soil | _____ Existing structures have no foundation problems |
| _____ Existing soil will be removed and replaced with engineered fill. | _____ Footings will extend through fill and into undisturbed soil to the required depth. |
| _____ Soils have been classified by an Arizona architect or engineer who has designed the foundation system. | _____ Other _____

_____ |

I/We agree to abide by any additional requirements the County may impose as a condition of granting this request, or alternatively, I/We will exercise the option to retain an Arizona registered civil engineer in the private sector to submit an alternative design for review and approval.

Signature _____ Date _____

FOR OFFICIAL USE ONLY

WAIVER REQUEST DENIED: Your request for waiver of soils investigation report cannot be granted for this project. Investigation of the site and County records indicate problem soil conditions in the immediate area. A soils report and recommendation by an Arizona registered civil engineer will be required.

WAIVER REQUEST GRANTED: Based on the design submitted as shown on the plans.

WAIVER REQUEST GRANTED SUBJECT TO THE FOLLOWING: The applicable design conditions contained herein must be incorporated into the plans for the proposed project. This department reserves the right to impose additional conditions or to require a soils report if the foundation inspection by the building inspector discloses conditions which, in his/her professional opinion, warrant such action. The applicant agrees to hold the County harmless and free of any liability as a result of granting this waiver.

1. All footings shall be a minimum of _____ feet below undisturbed natural grade unless deeper footings are required to satisfy structural requirements.
2. A minimum of _____ grade 40 steel rebars shall be installed. All footings and rebar to be continuous.
3. A minimum of _____ grade 40 steel rebars at _____ o.c. vertically.
4. A minimum of _____ grade 40 steel rebars horizontally at _____ o.c., vertically as bond beams.
5. A minimum of _____ grade 40 steel rebars each way are required for each footing supporting this structure.

Project Type: Site Built Home _____ Mobile Home _____

No. Bedrooms _____

Other _____

Building projects that include the installation of septic systems require an additional permit from the Graham County Health Department. Builders and Contractors are encouraged to visit with the Health Dept. at the earliest opportunity to obtain information on septic system installation and permitting requirements. At a minimum, septic system permit requirements include a site suitability process, i.e., soils testing/borings, subsurface investigation and a determination if there is sufficient space available to meet setback and reserve area requirements. The site suitability process must be accomplished by an appropriately Licensed Contractor and in fact it is recommended that the entire project be accomplished by a licensed contractor who will also prepare the permit application. In order to be fully assured that the property that you intend to develop is suitable for a conventional septic system, you may want to have this work accomplished in advance of beginning any other building projects. On rare occasions it may be determined that a property is unsuitable for a conventional system, in which case an alternative wastewater system may need to be installed. Alternative systems are relatively expensive (\$10,000 or more), require more time to approve and install and require more maintenance.

ACKNOWLEDGEMENT

I understand and acknowledge that the issuance of a building permit from the Planning & Zoning Office does not include, nor does it assure that I may be able to obtain a permit from the Health Dept. for the installation of a conventional septic system. I also understand that I need to submit a copy of my Building Permit Application (Pg. 1) and Plot Plan with my application for a septic system permit.
